

Oscar Alejandro Vaca Lopez

SYSTEMS ENGINEER | IT SUPPORT | AUTOMATION

Target Roles: IT Support Specialist, Junior SysAdmin, IoT Engineer

Irapuato, Guanajuato, Mexico +52 462 100 9235 oscaralejandrovacalopez@gmail.com LinkedIn GitHub

PROFESSIONAL SUMMARY

Systems Engineer with hands-on experience supporting production operations, business systems and network infrastructure in high-demand environments.

Strong fit for IT Support and Junior SysAdmin roles through incident troubleshooting, endpoint administration, connectivity stabilization and service continuity.

IoT project background with Raspberry Pi and ESP32, plus Python automation to streamline operational workflows.

TECHNICAL SKILL SET

IT SUPPORT

- Incident troubleshooting
- PC, printer and endpoint setup
- User support and issue resolution

NETWORKING

- WiFi and access points
- Antenna links and connectivity
- Network diagnostics

SYSTEMS & DEV

- Python scripting
- Odoo ERP support
- REST API usage

IOT & DATA

- Raspberry Pi / ESP32
- MySQL / MariaDB / SQL Server
- AWS Cloud fundamentals

CORE STRENGTHS

Problem Solving

Ownership

Clear Communication

Continuous Learning

Team Collaboration

Adaptability

PROFESSIONAL EXPERIENCE

Systems Engineer / IT

Paraiso Natural - Health Food Store | February 2026 - Present | Full-time, Irapuato

- POS system migration and administration to optimize sales and inventory operations.
- Python script development for administrative and warehouse automation.
- Security camera installation, WiFi networks and computer equipment maintenance.
- Website development and digital presence management.
- AI assistant implementation and intelligent automation for administrative tasks.
- General IT support and infrastructure maintenance.

Security

Systems Engineer / IT

Comercializacion Diem del Bajio S.A. de C.V. | May 2025 - February 2026 | Full-time

- Delivered day-to-day IT support for end users, keeping workstations, printers and monitoring devices operational.
- Diagnosed and resolved network incidents, including access point configuration and connectivity stabilization.
- Supported Odoo operations through functional adjustments and module-level improvements.
- Set up warehouse antenna links and restored communication flows during service interruptions.
- Built Python scripts to automate repetitive internal tasks and reduce manual workload.
- Implemented Raspberry Pi based solutions for specific shop-floor and operational needs.
- Worked closely with logistics workflows to align technical proposals with business priorities.

Operations IT

IoT Intern - Industry 4.0

Kromberg & Schubert Mexico | 2025 (Professional Internship)

- Implemented IoT solutions on Komax production machines with Raspberry Pi and ESP32 platforms.
- Enabled real-time monitoring and process optimization aligned with Industry 4.0 initiatives.
- Designed an intelligent hardware/software ecosystem to improve operational efficiency.

CERTIFICATIONS

- AWS Cloud Practitioner Essentials (2024)
- AWS Cloud Fundamentals (2024)
- What is Cloud Computing? AWS (04/2024)
- Laptop Repair Technician (2021)
- English B1

EDUCATION

B.S. in Computer Systems Engineering

ITESI - Irapuato, Guanajuato | 2020 - 2026

Networking specialization. Projects include telemedicine with Alexa and IoT, object detection with ESP32-Cam and Python, and a Raspberry Pi + MariaDB sensor ecosystem.

Industrial Maintenance Technician

CECyTEC - Irapuato, Guanajuato | 2017 - 2020

Technical degree in industrial systems maintenance. Final project: autonomous line-following vehicle for tool distribution between workstations.
