

Oscar Alejandro Vaca Lopez

SYSTEMS ENGINEER | IT SUPPORT | PROCESS AUTOMATION

Irapuato, Guanajuato, Mexico +52 462 100 9235 oscaralejandrovacalopez@gmail.com LinkedIn GitHub

PROFESSIONAL PROFILE

Systems Engineer focused on IT operations, technical support and continuous improvement. Hands-on experience in production environments, ensuring reliable infrastructure, connectivity and business systems.

I build solutions with Python, Odoo and IoT devices (Raspberry Pi / ESP32) to optimize processes and align technology with business and logistics needs.

TECHNICAL SKILLS

FRONTEND

- HTML5 / CSS3
- JavaScript
- PHP

BACKEND

- Python
- Odoo / ERP
- REST APIs

DATABASES

- MySQL / MariaDB
- SQL Server

TOOLS

- Git / GitHub
- AWS Cloud
- Raspberry Pi / ESP32

SOFT SKILLS

Leadership

Teamwork

Problem Solving

Communication

Continuous Learning

Adaptability

Creativity

Time Management

CERTIFICATIONS & OTHER

- AWS Cloud Practitioner Essentials (2024)
- AWS Cloud Fundamentals (2024)
- What is Cloud Computing? AWS (04/2024)
- Laptop Repair Technician (2021)
- English B1

PROFESSIONAL EXPERIENCE

Systems Engineer / IT

Comercializacion Diem del Bajio S.A. de C.V. | May 2025 - February 2026 | Full-time

- Maintenance, installation and configuration of security cameras and monitoring equipment.
- Support and functional adjustments in Odoo, including modules and operational improvements.
- End-to-end network support: access point deployment, troubleshooting and connectivity stabilization.
- Warehouse connectivity via antennas, link configuration and communication incident resolution.
- Configuration and maintenance of printers, PCs and end-user computing devices.
- Development of Python scripts and programs to automate internal processes.
- Implementation of Raspberry Pi solutions for specific operational requirements.
- Logistics process understanding to propose future technology implementations.

Odoo

Networking

IT Support

Python

Raspberry Pi

Security Cameras

IoT Intern - Industry 4.0

Kromberg & Schubert Mexico | 2025 (Professional Internship)

- Implemented strategic IoT solutions on production equipment (Komax machines) using Raspberry Pi and ESP32.
- Real-time monitoring and optimization of production lines aligned with Industry 4.0 requirements.
- Built an intelligent ecosystem to improve operational efficiency and overcome legacy hardware limitations.

IoT

Raspberry Pi

ESP32

Industry 4.0

Python

EDUCATION

B.S. in Computer Systems Engineering

ITESI - Irapuato, Guanajuato | 2020 - 2026

Networking specialization. Projects include a telemedicine solution with Alexa and IoT, object detection with ESP32-Cam and Python, and a Raspberry Pi + MariaDB sensor ecosystem.

Industrial Maintenance Technician

CECyTEC - Irapuato, Guanajuato | 2017 - 2020

Technical degree in industrial systems maintenance. Final project: autonomous line-following vehicle for tool distribution across workstations.

AWS Cloud Certifications

Amazon Web Services | 2024

AWS Cloud Practitioner Essentials, AWS Cloud Fundamentals and "What is Cloud Computing?" program.
